# Easy to Use & Maintain

①

Wide pump installation space

②

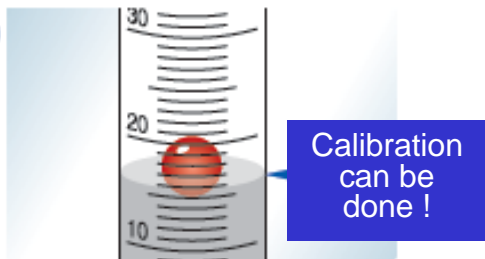

Control box can be mounted

③

Hose & cable holder

④

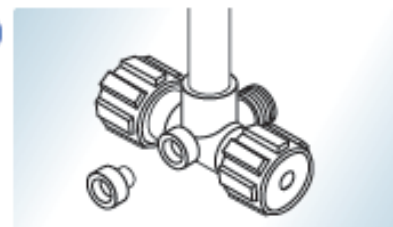

Level gauge is standard-equipped

⑤

Residual chemical is reduced (compared w/ conventional unit)

⑥

Small drain for easy maintenance

⑦

Attaching and detaching pump cover is easy

⑧

Easy to mount options (level switch)

⑨

Piping the returning hose is easy

# Safe & Secure for All Users

1

Big inlet not to spill over

2

Slant and slope design to protect the tank from spilled chemical.

3

Guide rib prevents the chemical from getting into the pump space

4

Easy to lock

5

Chemical Sticker to avoid misfeeding

6

4-point anchors to hold the tank

7

UV-resistance lids

8

Pump cover to protect pumps

9

Suction valve w/ strainer catches the dust and air.

## For Injection of Sodium Hypochlorite

DCLPW  
can be  
installed

- Pump is installed as low as possible.
- Degassing Joint prevents air from coming into the pump head
- CLPW will push out the built-up air from the pump head

## No more Gas Locking
